GitHub: github.com/adityaraj98769
Portfolio: ar-dnew-portflio.vercel.app

CORE SKILLS

Languages
Python, JavaScript, TypeScript, Java

Frontend
React.js, Next.js, Vite, Tailwind CSS

Backend
FastAPI, Node.js, REST APIs

AI / ML
Machine Learning, EDA, Feature Engineering, AI Integration

Data
Data Analytics, Visualization

Databases
PostgreSQL, Supabase, MongoDB, MySQL

Tools
Git, GitHub, Vercel, Render

EDUCATION

B.Tech — Computer Science Engineering
Maharishi University of Information Technology
2023–2027 • CGPA 7.89

ACHIEVEMENTS

- 1st Position — InnovativeX, NPGC College, Lucknow.
- 16th Rank — DevSummit 2026, among 55 teams in a 24-hour hackathon.

FOCUS

AI/ML • Full-Stack Development • Product Engineering

PROFESSIONAL SUMMARY

Computer Science Engineering student focused on AI-powered products and full-stack development, with hands-on experience building production web applications and AI/ML systems. Experienced with Python, FastAPI, React/Next.js and Node.js, with a practical product-building mindset.

EXPERIENCE

Code Assure | Full-Stack Development • *1 Month*

- Built Takshay Design, a production-level web application with responsive frontend, admin panel/CMS, authentication, backend services, database integration and deployment.
- Worked hands-on across UI development, API integration, database workflows and production deployment.
- Live production project: takshaydesign.in

SELECTED PROJECTS

Waste-to-Worth | AI Integration & Sustainability Logic Engineer

- Integrated Google Gemini 2.5 Flash for AI-powered waste recognition and designed the image-to-structured-analysis inference pipeline.
- Developed an LCA-based Carbon Credit Algorithm using IPCC emission factors, including CO_2 reduction and waste-disposal impact calculations.
- Implemented streak-multiplier logic and contributed to AI workflow design, technical documentation and sustainability methodology.

SkillSync-AI | Resume Analyzer & Interview Preparation

- Built an AI-powered platform to analyze resumes, identify skill gaps and generate actionable interview-preparation guidance using Python, FastAPI, React.js and Node.js.

HACKATHONS

- InnovativeX — Presented Waste-to-Worth and secured 1st position.
- DevSummit 2026 — Built and showcased a live product under 24-hour hackathon constraints; ranked 16th among 55 teams.
